

ABOUT US

4d booking software is all-in-one software that can change the way a hotel business works. The software is designed to reduce operational costs, increase occupancy and profitability. This cloud based solution enables hotel websites to take online bookings through our plug-in placed on the website and bookings can also be made manually through the booking software. Complete calendar based control on bookings and room distribution is provided to avoid any overbooking. Carefully designed reports provide management information for clear analysis & decision making.
